

Assignment 1

Statement: Create an account in AWS and configure a budget.

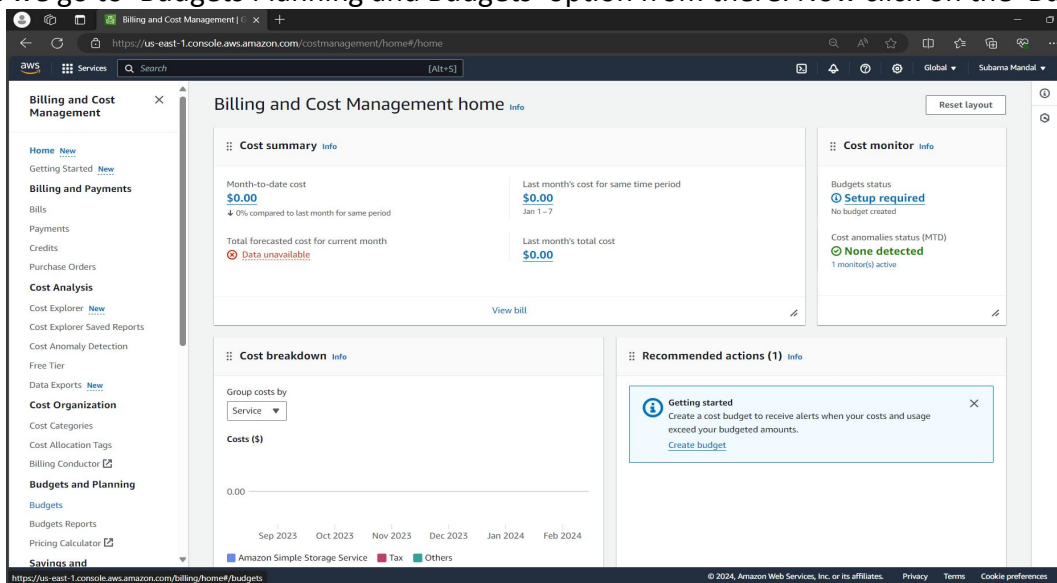

Steps:

For configure Budget.

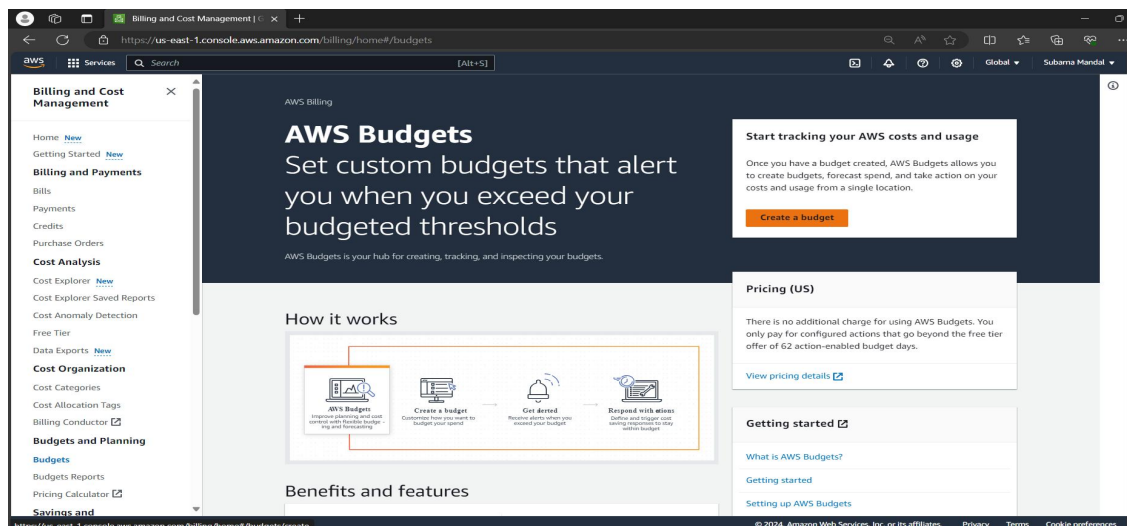

a) At first we go to 'Account' section and from there we go to 'Billing cost management'.

b) Then we go to 'Budgets Planning and Budgets' option from there. Now click on the 'Budgets' option.

c) Now go to 'Create a Budget' option. Here we will set alert. After crossing budget, notification will be created in mail.

d) Now set up the budget ,select Customize(Advanced) option.

The screenshot shows the AWS Billing and Cost Management console. The left sidebar contains navigation links for Home, Getting Started, Billing and Payments, Cost Analysis, and Cost Organization. The main content area is titled 'Create budget' and shows 'Step 1: Choose budget type'. Under 'Budget setup', the 'Customize (advanced)' option is selected. Under 'Budget types', the 'Cost budget - Recommended' option is selected. The 'Usage budget' option is also visible but not selected.

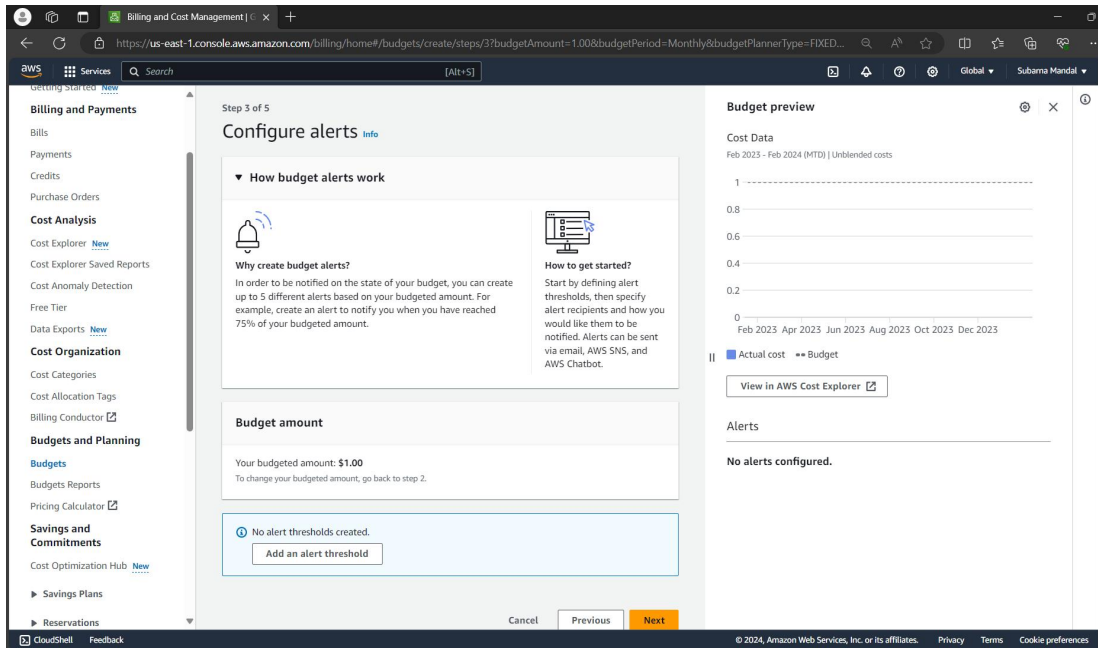

e) Give budget name. Set budget period Monthly and budget renewal type as Recurring Budget. It will start from last and continue up to last day of month.

The screenshot shows the AWS Billing and Cost Management console. The left sidebar contains navigation links for Home, Getting Started, Billing and Payments, Cost Analysis, and Cost Organization. The main content area is titled 'Create budget' and shows 'Step 2: Details'. Under 'Details', the 'Budget name' is set to 'monthly'. Under 'Set budget amount', the 'Period' is set to 'Monthly' and the 'Budget renewal type' is set to 'Recurring budget'.

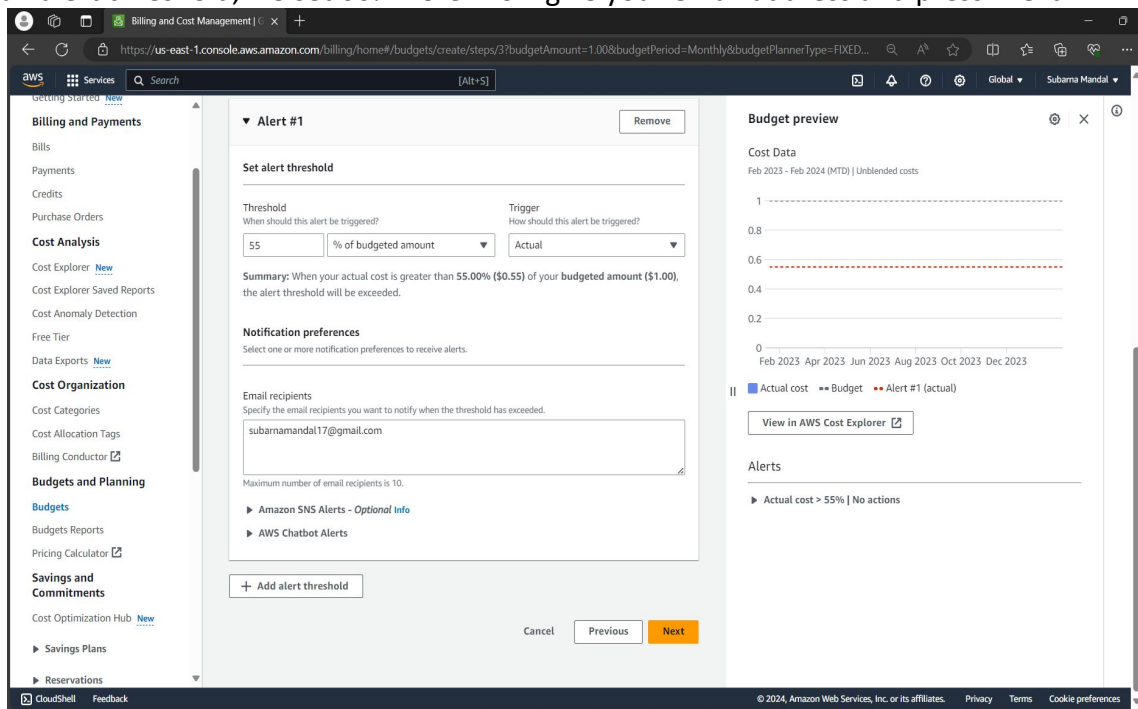

f) After this set budget amount (lets take 1.00\$) and now press Next without changing other option.

The screenshot shows the AWS Billing and Cost Management console. The left sidebar contains navigation links for Home, Getting Started, Billing and Payments, Cost Analysis, and Cost Organization. The main content area is titled 'Create budget' and shows 'Step 3: Budgeting method'. Under 'Budgeting method', the 'Fixed' option is selected. Under 'Budget scope', the 'All AWS services (Recommended)' option is selected. The 'Advanced options' section is expanded, showing 'Aggregate costs by' set to 'Unblended costs' and 'Supported charge types' set to 'Upfront reservation fees', 'Recurring reservation charges', and 'Other subscription costs'.

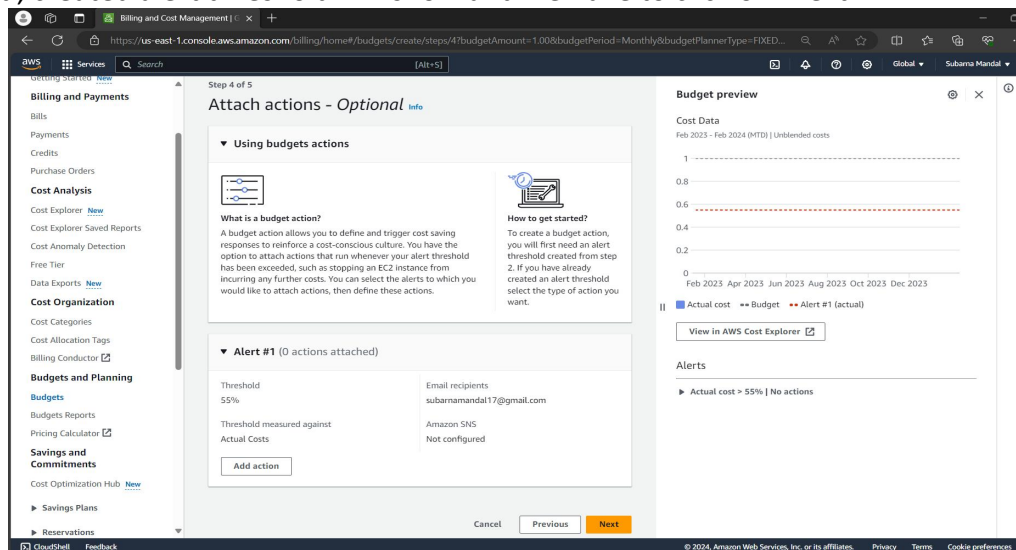

g) After this click on 'Add an alert threshold' and create a alert threshold.

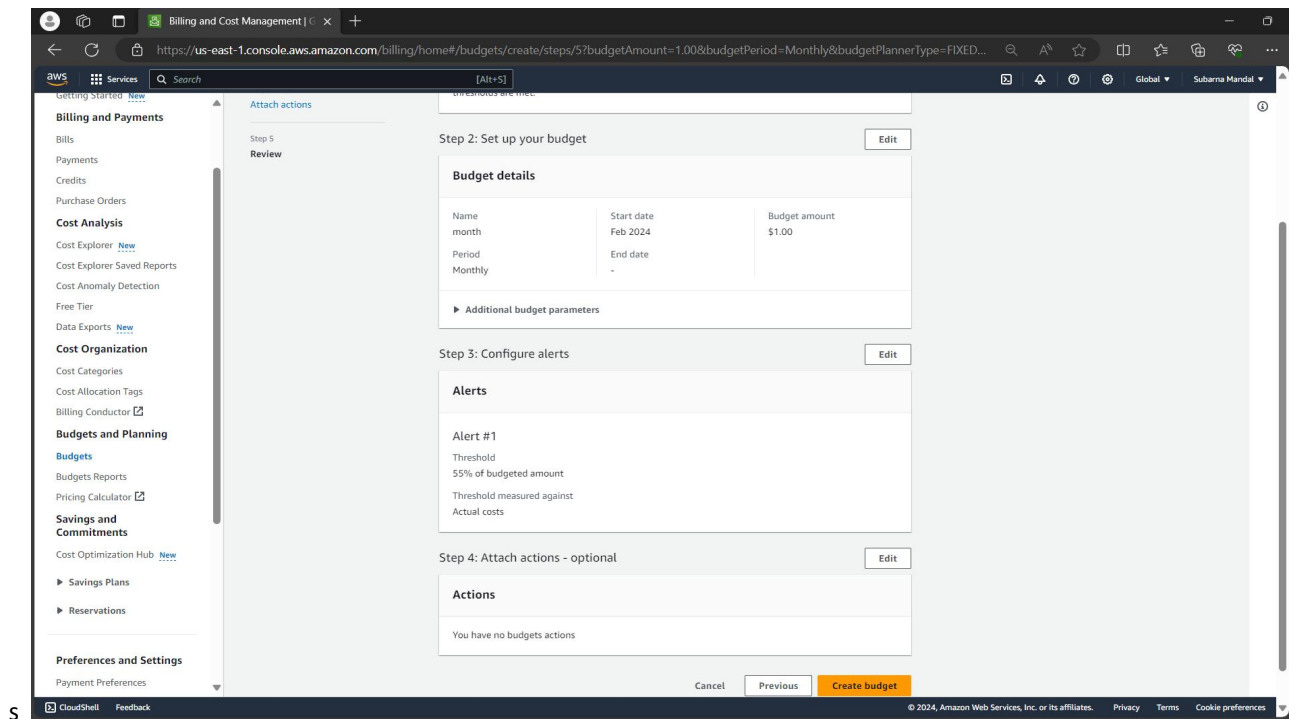

h) Set an alert threshold, we set 60% here. Now give your email address and press 'Next'.

i) After that , created alert threshold will show and we have to click on 'Next'.

j) Now a final page will occur ,and we can edit if there some mistake. After that click on ‘Create Budget’ to creating the budget.

k) Our budget is creating successfully , and if we want to delete this we have to click on the budget name then delete.
